1. BACKGROUND

The Royal Bafokeng Nation (“RBN”), administered through the Royal Bafokeng Administration (“RBA”), is a traditional community based in the Rustenburg Valley in the North West Province, South Africa. The RBN area falls within the Rustenburg Local Municipality (“RLM”) and comprises 29 villages, organized into 5 regions over a land size ranging from 1200 to 1400 km². The area is home to approximately 128 000 people according to the latest count from PULA (i.e. Population and Use of Land Audit, an independent census conducted within the RBN boundary) of those, 67% are descendants of the Bafokeng, whilst 33% are Non-Bafokeng.

2. INTRODUCTION

The Royal Bafokeng Administration (RBA) strives to consistently provide an uninterrupted supply of quality water to all its communities, however given the reliance on water boards for supply of potable water, which is also not always possible. Resultantly various RBN villages consistently endure an irregular supply of water. To eradicate this challenge RBA will make a provision of Jojo water tanks that can be used to store water for times of water supply interruptions and shortages

The RBA thus require a panel of service providers to construct jojo tank steel stands to communities and villages known to have water shortage challenge within the RBN.

RBA reserves the right to appoint more than one service provider.

3. SCOPE OF WORK

Specifications for steel tank stand: dimensions of 2 meters by 2 meters by 1.5 meters.

Framework and Architecture:

- Steel Type: It is suggested to use hot-dipped galvanized steel to avoid rust and corrosion.
- Steel with a thickness of 1.6mm - 6mm should be utilized for the primary structural frame in order to guarantee stability and support.

Post Columns:

- Dimensions: 76mm x 76mm square tubing or circular tubing of equal size.
- Thickness of the wall should be at least 1.6mm to ensure strength and longevity.
- Spacing: Four columns in every corner, with extra support if the weight or height surpasses minimal standards.

Cross Beams:

- Use 100mm x 50mm rectangular steel tubing with a 3mm wall thickness for the tank's base support.

Grating or support foundation:

- Steel grid plates or cross bracing made from 50mm x 50mm x 5mm angle iron can be utilized to create a stable platform for the tank to sit on.

The work will be performed according to the below schedule:

REGION	NUMBER OF JOJO TANK STAND REQUIRED
CAPITAL	85
CENTRAL	5
SOUTH EAST	0
NORTH EAST	52
NORTHERN	20
TOTAL	162
